CAREER GOAL

I am looking for a job as a **Junior Web Developer** because I like to solve problems, achieve goals and constantly develop. Finished **Bootcamp Web Developer** let me take the first step to make my own plans come true. I am flexible person and open to new opportunities. I am serious about the responsibilities entrusted to me that I always perform with 100% commitment. At work I'm punctual, very accurate, I easily make contact with team members and customer. I'm currently developing my skills related to **JavaScript** programming language. I plan to study engineering in the field of **Computer Science**. In the future, I would like to gain competences that allow me to work as a **Full Stack Developer**. I believe that in your company I will be able to take the next steps as a **programmer**.
